## PROFESSIONAL SUMMARY

---

Results-driven Technical Product Manager with specialized expertise in API Security and Quality Assurance. Proven ability to lead cross-functional teams in delivering complex software platforms while embedding security best practices into the development lifecycle. Adept at bridging the gap between engineering and business stakeholders to drive operational excellence, accelerate delivery, and reduce risk.

## WORK EXPERIENCE

---

### Technical Product Manager | Clive Alliance

Jan 2026 – Present

*Key Projects: Juno (Hiring Platform) · SuprSync (Workforce, Inventory Management & Payroll Platform)*

- Drove end-to-end delivery of two concurrent SaaS platforms — Juno and SuprSync, coordinating cross-functional teams of 7+ across engineering, product, and QA, achieving a 35% improvement in on-time feature delivery.
- Restructured sprint planning and backlog grooming processes, increasing team velocity by 28% within the first quarter and reducing average cycle time from 18 days to 11 days.
- Designed and implemented a QA optimization framework across both platforms, introducing automated regression suites that reduced manual testing effort by 45% and cut defect escape rate to production by 60%.
- Led the technical scoping and roadmap definition for SuprSync's payroll and inventory modules, translating stakeholder requirements into phased delivery milestones and reducing scope creep by 40%.
- Established risk registers and dependency tracking for Juno's hiring pipeline features, proactively resolving 12+ cross-team blockers and maintaining zero critical-path delays across 3 consecutive releases.
- Partnered with engineering leads to embed API security checkpoints into the CI/CD pipeline for both platforms, ensuring 100% compliance with OWASP security standards prior to each production deployment.
- Implemented stakeholder reporting cadence using Jira dashboards and Confluence documentation, improving visibility into project health and increasing stakeholder satisfaction scores by 30%.

### Technical Product Manager | JAPA.RUN

July 2024 – Dec 2025

- Led cross-functional project teams of 15+ members across engineering, marketing, and design, delivering 8 major initiatives on schedule with 95% stakeholder satisfaction.
- Implemented Agile/Scrum methodologies and project governance frameworks, reducing delivery timelines by 30% and improving team velocity by 40%.
- Spearheaded risk mitigation strategies that identified and resolved 15 critical blockers — including potential security vulnerabilities — prior to production release.
- Integrated security checkpoints into the Agile SDLC, ensuring all feature releases met security standards before deployment.

### SDET | JAPA.RUN

June 2024 – Oct 2024

- Designed, developed, and tested key features for a community-based real-time chat platform.
- Built automated workflows and maintained scalable testing systems, improving coverage by 35%.
- Debugged frontend performance issues, reducing page load times and improving system efficiency by 20%.

## EDUCATION

---

### Bachelor of Engineering — First Class Honors

Covenant University

2018 – 2023

## TECHNICAL SKILLS

---

**Product Management:** Agile, Scrum, Kanban, Jira, Confluence, Trello

**Security:** OWASP Top 10, API Penetration Testing, Vulnerability Scanning, Burp Suite

**Development & QA:** Playwright, Postman, JavaScript, CI/CD Pipelines, Performance Testing, Automated Regression Testing

## **CERTIFICATIONS**

---

- API Security Fundamentals – API Sec
- API Penetration Testing – API Sec
- Registered Scrum Basics – Scrum Inc
